

CPR/AED TRAINING

Do you and your employees need to know how to save a life?

Time is critical when someone's heart has stopped and any delay in starting resuscitation efforts could cost that person their life.

Cardiopulmonary resuscitation (CPR) is a lifesaving technique useful in many emergencies.

This course is taught by certified EMS staff and is for anyone who needs to meet a job, regulatory or other requirement.

Certification is valid for two years.

Come to us or we will come to you.
